SUPERIOR HST TRANSMISSION

We've enhanced the power, performance, and durability of our Hydrostatic Transmission, and we've given it a name: HST Plus. Now you can choose between HST Plus, GST (Glide Shift Transmission) or FST (Fully Synchronized Main and Shuttle Transmission) for the system that's best suited to meet your needs.

HST PLUS (HYDROSTATIC TRANSMISSION)

Tackle any task with ease and efficiency. With startling precision, the new HST Plus's automated control of both the HST pump and two stage motor gives you optimal performance, regardless of the task, working conditions, or operator expertise. Pedal operation is light and smooth to provide the Grand L40 with a more comfortable, easier-to-operate, and higher performance HST than ever before. Performance upgrades includes load-sensing (Stall-Guard), hi/lo (Hydro Dual-Speed), HST response control, and Auto-Throttle Advance.

NEW HST Pedal

The new and improved HST pedal is easy to understand and straight-forward to operate. Toe or heel operation is possible. Simply press the pedal forward to move the tractor in a forward direction, or press the pedal backward to move the tractor in a reverse direction.

HYDRAULIC SERVO SYSTEM

Kubota's new HST Plus includes an electronically controlled hydraulic servo mechanism that decreases the amount of pressure required to depress the HST pedal. This mechanism creates a more responsive pedal, which in turn delivers smoother handling and more control, whatever the load size. In addition, the system helps to reduce vibration, shock, noise and fatigue to provide a gentler ride and improved performance.

IntelliPanel™

**STAY IN TOUCH WITH YOUR GRAND L40 WITH THE
ADVANCED INTELIPANEL™**

Recognized for its superb reliability and usability, Kubota's state-of-the art diagnostic IntelliPanel keeps you informed of the workings and goings-on of your Grand L40. With easy-to-read indicators, displays and sensor messages, this interactive system assures that you'll always know exactly how the tractor is functioning.

Kubota Engine

The compact E-TVCS (Three Vortex Combustion System) diesel engine delivers up to 59 gross engine HP for higher torque rise and quicker engine starts. It's well-balanced for less engine noise and vibration, and surpasses EPA tier-II regulations. The L5040, L5240, and L5740 models have turbo-charged engines.

Mid-PTO (Optional)

An optional, semi-independent mid-PTO is available on all Grand L40 models, for use with a variety of performance matched mid-mount and front-mount implements.

Heavy-Duty Front Axle

A larger front loader lift capacity calls for an extra heavy-duty front axle and main frame. The heavy-duty front axle was specially designed to ensure high power output and durability. It perfectly matches the performance of exceptional Grand L40 front loaders.

Power Steering

Responsive hydrostatic power steering makes every job easier. Straight-a-ways and tight turns alike are taken smoothly. Steering remains easy and worry-free, even when hauling heavy loads or using the front loader.

Halogen Head Lights

Halogen head lights provide brilliant wrap-around lighting in low-light conditions.

New Design

The Grand L40's front end is redesigned to be attractive and functional.

Wide Step

The Grand L40's wide step and open platform provide a large, more comfortable step-through area.

Tilt Steering Wheel

The tilt steering wheel is practical and easy to use. Simply step on the pedal, select the desired tilt position, and release the pedal to lock. Step on the pedal again to unlock the wheel, for easy tractor mounting and dismounting.

Full Open Hood

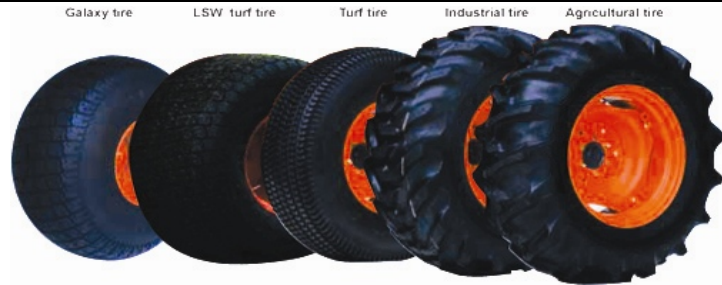

The redesigned **all metal** hood makes it easier than ever to access the engine for routine service and maintenance. The one-piece hood opens wide to fully expose the engine area.

Open Floor Seat

Strategically positioned over the engine, the removable seat allows easy access and servicing of hydraulic brakes, sensors, components, and more.

Tires Options

For different applications, agricultural, industrial, turf, and specialty turf tires are available on Grand L40 Series tractors.

Open Platform

The spacious, flat operator platform offers easy access and plenty of room for comfort.

Deluxe Seat

The Grand L40 gives you comfort where you need it most, with its deluxe reclining seat. Standard features include arm-rests, wide seating, adjustable shock-absorbing springs, retractable seat belt and an ergonomic design that adjusts to your posture.

Seat Storage Pouch

A storage pouch at the back of the seat is useful for storing manuals, valuables, and other items, keeping them easily accessible.

Compact Tractors

L3240/L3540/L3940/L4240/L4740/L5240/L5740

Deluxe Console

A premium console has a large cup holder and storage space for valuables. A 12V power point is located conveniently in the console.

Remote Hydraulic Valve Options

First, second, or third rear hydraulic control valves can be added to the Grand L40. Productivity and versatility can be maximized with a broad range of implements.

3-Point Lift Cylinders

A feature typically found only on larger tractors, Grand L40 models are equipped with two large tandem 3-point lift cylinders. Lift capacity is impressive and unequalled, while the external design provides for easy maintenance.

Live Independent PTO

The live independent PTO clutch is hydraulically actuated, which allows both the rear and mid PTOs to be independently engaged/disengaged; even while the tractor is in motion. To complete the package, a neutral/auto shut-off system and protective flip-up shield offer increased PTO safety and productivity.

Telescopic Lower Links

Telescopic lower links are standard equipment on the Grand L40 Series. 3-Point implement hook-up and detachment is made more quick and easy, allowing for use of a wide range of tractor implements.

Transmission Oil Level Indicator

Positioned for easy access, the transmission dipstick can be found on the exterior rear of the tractor.

GRAND L40 CAB FEATURES AT A GLANCE

L *Compact Tractors*
L3240/L3540/L3940/L4240/L4740/L5240/L5740

4WD models

The Grand L40 4WD provides superior pulling power and traction in any working condition. The front-wheel drive bevel gear assures that you always get a full, smooth transfer of power. Combined with a 55 degree steering angle and compact differential, the Grand L40 4WD gives you excellent ground clearance and maneuverability.

Easy Access

Wide doors with gas-struts and steps on both sides of the tractor are standard equipment on the Grand Cab.

Excellent Visibility

The view is great! The cab's elevated seat, curved, frameless glass windows and doors give operators 360 degree visibility that virtually eliminates blind spots. Check the front tire position or the operation of rear implements with confidence. An increased roof height on the Grand L40 improves forward visibility even further.

Expanded Model Range

The Kubota factory-installed Grand Cab is now available on all Grand L40 HST model tractors.

Optional Equipment for Grand Cab

- Optional equipment includes:
- corner and rear window defoggers
 - rear work lights
 - rear windshield wiper
 - CD/radio with weather band or cassette radio with weather band

Grand Cab

The Grand L40 gives you a level of comfort that other tractors in its class can't or won't. One look let's you know that your surrounded by a host of convenient perks and bonuses that are there to make your job easier. Some of the highlights include: an extra generous seat and floor area that won't cramp your style; quiet operation that's music to your ears; climate control for keeps you warm or cool; and intelligently place controls. In short, it's a control center that's centered on you. Your needs. Your comfort. The Grand L40s new Grand Cab design truly does put you in the lap of luxury.

GRAND L40 CAB FEATURES AT A GLANCE

Compact Tractors

L3240/L3540/L3940/L4240/L4740/L5240/L5740

Standard Equipment for Grand Cab

- Standard equipment includes:
- AC/heat with fresh/recirculated air.
 - 12V power source.
 - 55 amp alternator.
 - Front wash/wiper.
 - Front work lights.
 - Interior light.
 - Dual external rear view mirrors.
 - Deluxe cloth seat.

Windshield Wiper

The windshield wiper is hinged on the bottom to ensure a wide front view, even on rainy days. The park position doesn't interfere with forward visibility when not in use, and a washer function is standard equipment.

Rear Corner Windows

Rear corner windows can be opened to provide additional fresh air ventilation when desired.

Tinted Glass

Tinted glass cuts UV rays, is easy on the eyes, and helps to keep the interior temperature of the cab comfortable.

Frameless Doors

The frameless doors with curved glass provide superb, unobstructed side views, while making cab access easy.

L Compact Tractors
L3240/L3540/L3940/L4240/L4740/L5240/L5740

Engine Oil Level Indicator

For easy access, the engine oil dipstick can be found on the exterior right side of the tractor, just below the hood.

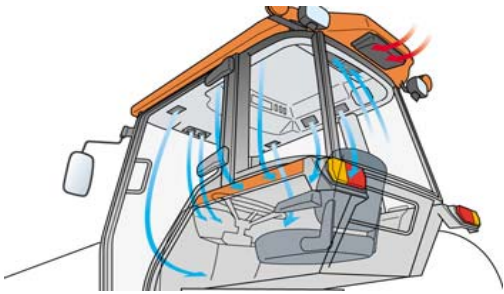

Adjustable Vents

A total of seven adjustable vents are thoughtfully placed to provide maximum comfort to the operator, or to defrost/demist cab glass more quickly.

Low Noise/ Low Vibration

The new larger integrated cab, the engine, sound-dampening material, and the full-floating, rubber-cushion ISO-mounted platform combine to decrease tractor noise and vibration levels. This reduces operator fatigue and increase comfort, especially during prolonged tractor use. It's hard to find a more quiet ride on a compact tractor!

Fresh/Re-circulated Air

With one simple flip of a switch, filtered air can be introduced into the cab from outside. Ventilation is increased, helping prevent the windows from fogging while pollutants are kept to a minimum. With another flip of the switch, re-circulated air helps to keep odors out, or helps heat, cool, or defrost.

Air-Conditioning/Heater

The new Grand L40 Series Grand Cab has exceptional performance to heat, cool, defrost, and demist with an upgraded standard air-conditioning and heating system.

Wide Opening Rear Glass

The wide opening rear glass of the Grand Cab provides ventilation when desired, and excellent visibility to the rear of the tractor.
