B3200HSD (FRONT)

FEATURES

Diesel Engine

The B3200 features a smooth-running 32HP, 4-cylinder, liquid-cooled diesel engine, with Kubota's E-TVCS (three-vortex combustion system) for increased power, high torque and cleaner emissions.

Mid-PTO

Kubota's B3200 comes standard-equipped with a powerful mid-PTO for easy operation of a mid-mount mower, or front-mounted implements such as sweepers or snowblowers.

Hydrostatic Transmission

When frequent changes in speed and direction are needed, HST responds with its convenient pedal control—which leaves your hands free for steering and implement control.

Quarter Inching Valve

With increments of ¼" at the lower link end, our quarter-inching valve provides easier valve control. This is perfectly suited for attaching or detaching implements or performing other sensitive jobs.

Loader Valve (Optional)

Loader operations are more convenient with the 4-position valve and control lever. Integrated into the tractor, this ergonomically positioned valve lets you attach the front loader and other front implements quickly and easily.

B3200HSD (FRONT)

FEATURES

Power Steering

High-capacity power steering offers higher torque, giving you responsive control, and a vibration dampening mechanism which helps reduce fatigue and increase comfort during long days on the job. In addition, maneuverability in soft ground is made much easier, especially during loader applications.

Double-Element Air Cleaner

Standard on the B3200, it keeps the engine running cleaner in dirty conditions, and simplifies maintenance.

Slanted Metal Hood

The slanted hood offers a clear view of front loader operations to improve operator productivity.

Headlights

Kubota's multi-reflective headlights let you see farther and better, so you can work effectively whenever and wherever you want.

Front Grill

The redesigned front grill is easy to clean and perfectly matches the B3200's slanted-nose design.
