FEATURES

Kubota Diesel Engine

Kubota diesel engines are known for their durability, high performance, energy efficiency and reliability. Their fuel efficiency, high torque, quiet operation and reduced emissions help you take on heavy mowing jobs for extended periods. And, whether it's our 21, 23, 26, or 31-horsepower engine, it will exceed the high expectations of the commercial landscaper.

HST Transmission

With superior HST and hydraulic clutch transfer capacity, Kubota's HST system optimizes performance to achieve maximum results. It's regulated by an external, gear hydraulic charge pump for smooth control, quiet operation, and quick overall response. Kubota's HST transmission is built to last, providing years of durable and reliable service that will far exceed professional standards.

PTO Clutch

Thanks to a wear-resistant, wet-type, multi-disk, hydraulic PTO clutch, the machine will work longer, but not harder. That's because it smoothly transfers power with maximum efficiency. For safety, the PTO clutch is also equipped with an internal brake, which stops the mower blades quickly after disengagement.

Durability

Kubota's HST transmission system is comprised of high-strength components for exceptional durability. With a strong rear tire axle, the HST system is designed and built to last.

Shaft Drive

The direct transfer of power from the HST and hydraulic wet-type PTO to the mower deck ensures smooth engagement everytime. Plus, the shaft-drive's low maintenance makes it the most dependable choice.

FEATURES

Semi-Pneumatic (Flat-Free) Front Caster Tires (Standard with ZD326/331 models)

An industry first for this size, the 15", flat-free caster tires were created to absorb impacts with the rigidity of their structural thickness. This feature greatly reduces the worry of downtime from flat tires, so you can spend more time working.

Speed Control Levers

The angle of the speed control levers can be shifted by 19° forward and backward, and their height can be increased or decreased by an inch, giving you excellent legroom, better reach and increased comfort. Also, we've increased grip size to reduce operator hand fatigue.

Cup Holder

Quench your thirst while on the job. Conveniently located to the left of the operator, the handy cup holder is capable of handling cans, cups, mugs, and bottles of various shapes and sizes to make sure you stay hydrated.

Front Cover

With a durable steel cover to protect the front of the mower, as well as the maintenance lift, the ZD300 Series will be less susceptible to damage during truck loading and unloading.

Instrument Panel

With an ergonomically angled control panel, you have easy access to the controls and indicators, including speed controls, fuel and oil gauges, the 1/4" cutting height adjustment dial, the PTO engagement lever and more.

FEATURES

High-Back Deluxe Suspension Seat

Outstanding comfort is what you'll feel with Kubota's standard deluxe link-type suspension seat with adjustable armrests. The extra-wide seat features weight adjustment, adjustable armrests, and much more to give the operator a custom fit.

Lumbar Support

A day of hard work won't be hard on your back. Thanks to the 3-position lumbar support offered by the ZD300 Series, your back will get all the support it needs.

Suspension Seat Adjustment Lever

There's no need to get up to make changes to your seat's suspension strength—you simply reach down in front of you and pull this convenient lever to make adjustments while you're working.

Reclining Dial

Lean back and get to work in the ZD300 Series's reclining seat. Just reach to the side and turn the handy reclining dial to adjust your seat to the perfect position.

Full-Flat Operator Platform

The wide, full-flat deck offers superior legroom and comfort. With no humps to straddle, your feet can remain free of obstacles. .

Kubota

FEATURES

1/4" Increment Cutting Height Adjustment

Cutting height can be easily changed, from 1" to 5" in 1/4" increments, with the 1/4" adjustment dial. Located conveniently on the control panel, the adjustment dial is easily accessed to increase or decrease cutting height.

Work Lights (Optional)

Mounted on the ROPS, optional durable work lights assist in safe driving in the dark and increase visibility on the work site.
